Subject: RE: Oregon 319 Allocations for FY98 and FY95?

Well, the statute calls for the awarded amounts, and I have seen a set of numbers for Oregon that are obligations by FY (which should be the same as the final awarded amounts—for any grants over 5 years old, at least), and the 2 sets of figures are different enough. They are pulling that information shortly, and I'm sure we'll eventually need them, so I don't want to take them off that task.

Hi Don,

Thanks. This is a very helpful document.

We probably don't need the awarded amounts at this time. For the issue paper, we can assume that the amount allocated is the same as the amount awarded. If one of the options regarding these earlier dates is selected, then we will need to check on the exact amount awarded, but if they are not, then it would be wasted effort.

Jayne,

I know you asked for Oregon's allocations going back in time, but CZARA ties the % withheld to "the amount awarded". This is a bit different.

We were able to track down the allocations by state going back to 1996. It is fairly safe to assume that the 1995 allocation was identical to the 1996 & 1997 allocations, since those were the years that the total 319 appropriation was stuck at exactly \$100M. See attached.

But as I noted, these figures are a bit different than the awarded amounts. We are in the process of pulling those #s, too (from our "obligations" tracking database). I will send you that update when I get it.

Don Waye
